UNIVERSITY OF REGINA ASPIRE CLINIC
Psychiatry Residency Program, UC-Riverside

Internship, residency and fellowship placements are a core component of all graduate medical education programs

In these clinical learning environments, the guidance and supervision of the qualified faculty members is paramount to training and preparing residents and fellows. A modern AV system can improve the frequency, quality and educational guidance of supervision through video streaming and recording of patient interactions.
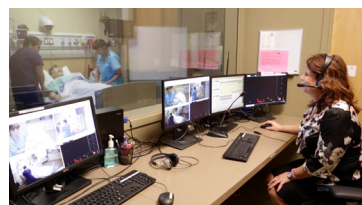

VALT was built from the ground up for clinical education programs. The VALT solution makes video observation and recording simple and effective yet provides powerful tools to meet all the confidentially and security needs of a functioning clinical environment. Beyond standard supervision requirements VALT can become a valuable educational and research tool for Clinic Directors, Supervisors and Students. The intuitive, easy to use browser interface can provide critical feedback and evaluation for both the student while comprehensive reporting tools can map patient progress and build a powerful research database.

SOLUTIONS

- Interprofessional Simulation Centers
- Masters Internships in Social Work and Counseling
- Psychiatry Residency & Fellowships
- Doctoral Internships

FEATURES

- HDTV Cameras for any size room
- HQ microphones with perfect AV synch
- Simple browser-based software interface
